Abstract: Civic education plays a crucial role in helping individuals understand their rights and responsibilities within society. This article highlights aspects that encourage young generations to develop civic awareness, respect state symbols, and remain loyal to national values.

Keywords: civic education, law, duty, patriotism, society, state symbols

In the rapidly developing independent Uzbekistan, every citizen must fully understand their duties and responsibilities and pass this knowledge on to future generations. "Whoever dedicates themselves to serving the people will achieve great honor." Not only teachers but also parents must fulfill this duty with great responsibility. This idea, even in a small way, contributes to building a democratic and humane legal state and society.

The Main Tasks of Civic Education:

- Teaching the younger generation to observe the ethical and legal norms that prevail in society.
- Providing students with information about their civil rights and duties and developing their ability to engage in civic activities.
- Instilling respect and love for state symbols and nurturing a sense of responsibility for protecting the honor of the President of the Republic.
- Awakening in students a love for their nation's history and national values, fostering a sense of pride and honor.
- Encouraging loyalty to the country, people, and nation, and aligning personal interests with national interests.
- Educating citizens who cherish and defend the independence and freedom of their homeland.

The Rights Guaranteed by the Constitution:

- The right to life, liberty, and personal security.
- Fair and public legal proceedings.
- Protection from unlawful intrusions into personal life.
- Freedom of movement, thought, speech, and belief.
- Participation in state affairs directly or through representatives.

- Involvement in legal meetings, demonstrations, and unions.
- Ownership rights, the right to work and freely choose a profession.
- Social security, healthcare, education, and scientific and technical creativity.

State symbols play a crucial role in nurturing civic awareness among students. These symbols include the national flag, emblem, and anthem, which represent the sovereignty and identity of the nation. We must respect and uphold these symbols, contributing to our country's welfare with our efforts.

“The future of every nation depends on its youth, and the future of the youth depends on the education they receive.” First and foremost, an individual must change themselves, then their family, as changes in families lead to changes in society. Since children receive their first lessons of upbringing from their families, every citizen must begin change from within themselves.
